INDA'S
AGRICULTURAL
CROP
PRODUCTION
ANALYSIS
(1997-2021)

Thinks

Uttarpradesh
is india's top
farming state

Agriculture
was
developed at
least 10,000
years ago

How to retain
the losted
varieties of
crop in india ?

How to
implement
organic
farming ?

Crop are
subsistence
crops that are
meant for human
consumption

Agriculture is
a backbone
of country's
economy

Why india
losts so
much of crop
varities ?

Previous crop
insurance
schemes are
fruitfull

FARMER

Chemical
management
in farming

Biological
pest control
for organic
cultivation

Indian
second
wide in farm
outputs

Nearly 60%
of the
country's land
area devoted
to farming

Direct
buying of
crops from
farmers

Try to avoid
wastage of
foods

Various health
problems are
found in humans
due to use of
pesticide in crop

30% of
farmers are
women
